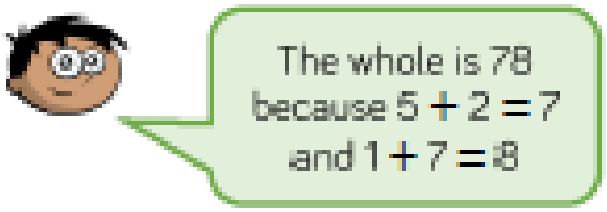
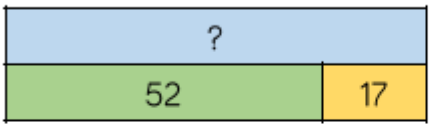
Amir has been asked to complete the bar model.

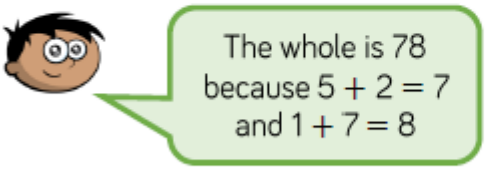


Explain to Amir what he has done wrong. How could you help him work out the correct total?

Answer

Amir has been asked to complete the bar model.





Explain to Amir what he has done wrong. How could you help him work out the correct total?

Amir has found the digit totals and put the digits together to make 78

The correct answer is 69 and this could be shown by using Base 10 and a place value chart.
