

# **Science Progression Document**

## **Early Years Foundation Stage**

### **Early Learning Goal**

ELG: The Natural World Children at the expected level of development will: - Explore the natural world around them, making observations and drawing pictures of animals and plants; 15 - Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class; - Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.

<b>Autumn</b>	<b>Spring</b>	<b>Summer</b>
<ul style="list-style-type: none"> <li>• Explore local area</li> <li>• Observation of the daily weather</li> <li>• Explore the incidental moments</li> <li>• Environment presentations around Autumn and the changes</li> <li>• Explicit stories that explore seasonal change</li> <li>• Introduction to the Year R outdoor environment</li> <li>• Bug hunt within the school grounds</li> <li>• Curiosity cube ideas: decaying fruits, Autumn fruits, Autumn display</li> </ul>	<ul style="list-style-type: none"> <li>• Explore the differences in the school grounds</li> <li>• Explore local environment to observe signs of spring</li> <li>• Observation of the daily weather</li> <li>• Explore the incidental moments</li> <li>• Environment presentations around Spring and the changes</li> <li>• Explicit stories about new life</li> <li>• Exploring animal life cycles</li> <li>• Pond dipping</li> <li>• Bug habitats</li> <li>• Observational drawings</li> <li>• Gardening club</li> </ul>	<ul style="list-style-type: none"> <li>• Explore the differences in the school grounds</li> <li>• Farm trip/visit</li> <li>• Explicit observation of the daily weather – data collection</li> <li>• Environment presentations</li> <li>• Non-fiction books to support life cycles</li> <li>• Pond dipping</li> <li>• Animal project</li> <li>• Child led curiosity cube</li> <li>• Gardening club</li> </ul>

## **Key Stage 1 – Working Scientifically**

**During years 1 and 2, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:**

- asking simple questions and recognising that they can be answered in different ways
- observing closely, using simple equipment
- performing simple tests
- identifying and classifying
- using their observations and ideas to suggest answers to questions
- gathering and recording data to help in answering questions

## Animals Including Humans

### Year 1

#### Animal Survival

##### Knowledge Block 1- Feeding for survival

- Animals are groups of **organisms** that need to consume food to survive.
- Food provides **energy** and the building blocks of **growth**.
- There are many different groups of animals including **fish, amphibians, reptiles, birds and mammals**. They have different structures, and they eat different types of foods.
- The structure of a variety of common animals varies  
**Mammals** have hair/fur and give birth to live young, **fish** can breathe underwater using gills, **birds** have feathers, beaks and wings. Females lay eggs. Most birds can fly, **reptiles** are air breathing and have scaly skin and lays eggs, and **amphibians** have smooth slimy skin and live on land and in water.
- Some eat other animals (**carnivores**), and others only eat vegetables (**herbivores**), and some like to eat both plants and meat (**omnivores**)
- Common animals that are **carnivores** include lions, cats, sharks and snakes
- Common animals that are **herbivores** include cows, horses, sheep, elephants and deer
- Common animals that are **omnivores** include humans, bears, monkeys and seagulls

##### Knowledge Block 2- Moving for survival

- Animals must move to get their food
- They will move in different ways to get their food
- Animals that eat other animals are called **predators**
- Animals that are eaten by other animals are called **prey**
- Animals feeding relationships can be illustrated in a **food chain**

### Year 2

#### Animal Life Cycles

##### Knowledge Block 1- Animal timelines

- Things that are **living**, move, feed, grow, **reproduce** and use their senses
- Animals grow until they reach **maturity** and then don't grow any larger
- Animals **reproduce** when they reach maturity (adulthood)
- All animals eventually, **die**
- Different animals live to different ages
- Different animals reach different sizes before they are able to reproduce
- Different animals reproduce at different ages
- Animals, including humans, have **offspring** which grow into adults
- Exercise, eating the right amounts of different types of food and **hygiene** are important to maintain good **health** and **wellbeing**

##### Knowledge Block 2- How animals get their food

**Habitats** are places where animals and plants live (from Year 1)

- Animals live in habitats in which they are suited.
- Different kinds of animals and plants depend on each other within **habitat**.
- Animals get their food from plants and other animals. This can be shown in a **food chain**.
- A food chain begins with a **producer**. This is often a green plant because plants can make their own food.
- A living thing that eats other plants is called a **consumer**.

<b>Knowledge Block 3- Sensing for survival</b> <ul style="list-style-type: none"> <li>The five sense organs are the <b>eyes</b> (for seeing), <b>nose</b> (for smelling), <b>ears</b> (for hearing), <b>tongue</b> (for tasting), and <b>skin</b> (for touching or feeling).</li> <li>Animals have senses to help them survive</li> <li>Animals have developed</li> </ul>	
---	--

Plants	
Year 1	Year 2
<b>Plants</b> <b>Knowledge Block 1- Where do plants come from</b> <ul style="list-style-type: none"> <li>A <b>seed</b> contains a miniature plant that can develop into a fully grown plant.</li> <li>A <b>bulb</b> has underground vertical shoots which already has modified <b>leaves</b></li> <li>Seeds and bulbs need water to grow but most do not need light (<b>germination</b>)</li> <li>Seeds and bulbs have food stores inside them to help the plant start to grow.</li> </ul> <b>Knowledge Block 2- Plant survival</b> <ul style="list-style-type: none"> <li>To survive plants, need to get water, light, and avoid being eaten</li> </ul> <b>Knowledge Block 3- How plants get what they need to survive</b> <ul style="list-style-type: none"> <li>A seed produces <b>roots</b> to allow water to get into the plant.</li> <li>A seed produces <b>shoots</b> to produce leaves to collect the sunlight.</li> <li>A basic plant structure can include leaves, flowers (blossom), petals, fruit, roots, bulb, seed, trunk, branches, stem</li> </ul>	<b>New Plants</b> <b>Knowledge Block 1- What flowers are for</b> <ul style="list-style-type: none"> <li>All <b>flowering plants</b> make seeds (<b>reproduction</b>) that can grow (<b>germinate</b>) into new plants</li> <li>Plants need water, light and a suitable temperature to grow and stay healthy</li> </ul> <b>Knowledge Block 2- What happens after a plant has produced seeds</b> <ul style="list-style-type: none"> <li>Some plants die after it has produced its seed and sometimes the plant lives for many <b>generations</b> producing seeds each year</li> </ul>

## Variation and Evolution

### Year 1

#### Habitats

##### **Knowledge Block 1- Adapted to survive**

- There is variation in all living things
- Animals and plants live in a variety of different places called habitats
- Animals and plants have adapted to survive in different habitats
- Wild plants such as ferns, daisies, nettles and dandelions grow randomly.
- Garden plants such as roses, tulips, poppies, daffodils are planted intentionally

##### **Knowledge Block 2- Plants adaptations for survival**

- Plants have specific adaptations for survival
- To survive they need to get water, light, and avoid being eaten

#### **Seasons**

##### **Knowledge Block 1- Surviving the changing seasons**

- Animals and plants have adapted ways of surviving the changing seasons
- These include **hibernating**, storing food, fattening up, **migration**, loss of leaves
- Trees can be either **evergreen** or **deciduous**.
- **Evergreen** trees keep their green leaves all year round.
- **Deciduous** trees lose their leaves every autumn.

### Year 2

## Materials

### Year 1

#### Describing Materials

##### Knowledge Block 1- The big idea about materials

- There are many different materials that have different observable **properties**
- Materials that have similar properties are grouped into **metals, rocks, fabrics, wood, plastic and ceramics** (including glass).

### Year 2

#### Changing Materials

##### Knowledge Block 1- How materials can change

- The properties of a material determine whether they are **suitable** for a **purpose**.
- Materials can be **changed** by **physical force** (twisting, bending, squashing and stretching).

## Forces

### Year 1

### Year 2

#### Pushes and pulls

##### Knowledge Block 1

- Objects can move (be in **Motion**) in various ways-roll, slide and bounce

##### Knowledge Block 2

- The **pushing** or **pulling** of an object can affect its motion.
- Pushing or pulling can do three things, **slow down, speed up or change the direction** of an object.

##### Knowledge Block 3

- The larger the push/pull the bigger the effect on motion
